

Subject
Claim
Cancel claims 1 through 5.

Add the following new claims:

6. (Original) An information processing apparatus having an image pickup apparatus incorporated therein,
said information processing apparatus comprising a personal computer including a body portion and a display panel section mounted for pivotal opening and closing movement on the body section,
an image pickup apparatus mounted on a top edge portion of said display panel section,
said image pickup apparatus comprising image pickup means for picking up an image of an object,
holding means for holding thereon a lens for forming an image on said image pickup means,
said holding means having a serrated circumferential portion thereon,
moving means for fitting with said serrated circumferential portion of said holding means to move said holding means along a direction of an optical axis of said lens when said moving means is turned, and
accommodation means for accommodating said holding means and said moving means therein.
7. (Original) An information processing apparatus according to claim 6, wherein said accommodation means is supported on said information processing apparatus for turning movement to any position within a range of 180 degrees from a direction same as the direction of a display unit of said information processing apparatus to the opposite direction to the display unit.
8. (Original) An information processing apparatus according to claim 7, wherein
